PROFILE

I'm Rujal Shrestha, a skilled computer engineer specializing in technologies like JavaScript, NodeJS, MongoDB & React Native. My experience includes developing a Signature Verification application, showcasing my problem-solving abilities and attention to detail. I thrive in collaborative environments, value effective communication, and am dedicated to staying at the forefront of technology trends. As a quick learner, I bring adaptability and a passion for innovation to every project.

PROJECTS

Signature Verification

Completed

Signature Verification is an application related to verifying authentication of an individual through the use of signature. We used Neural networks and compared with others signatures.

Travel Guide

Ongoing

Travel Guide is an application related to detecting heritage sites and giving the basic description of heritage sites using YOLO V8 model. We have created a mobile application using react native.

YouTube Downloader

Ongoing

YouTube Downloader is a web application related to downloading audio and video from URLs provided by the user. We use simple JavaScript and HTML properties.

HOBBIES

Watching Movies
Listening Music
Drawing
